

Trotec expands in Europe: New subsidiary in Spain

Wels, 11th of January 2017. The Austrian laser manufacturer Trotec Laser GmbH is strengthening its presence on the Iberian peninsula, with its recent acquisition of LCS - Laser Components and Services, S.L.U. In conjunction with Trotec's existing office in Spain, the acquisition will allow Trotec to enhance its services and support for Spanish customers, and expand its market reach thanks to the extended team. The new office and showroom are located in Barcelona, and more showrooms are already planned.

Decades of experience in the laser business

The company LCS Laser has been selling laser machines, components and laser services in Spain since 2002. Its founder, Carlos Alberto Rallo Querol, has more than 30 years of experience in the laser industry. Serving as the new managing director of Trotec Spain, he will continue to strengthen the company's strong tradition of customercentric focus with his team of 13 laser experts.

Innovation leader continues to grow

It was only in September when the previous dealer in Mexico, the company Gizmo S.A., was integrated into the Trodat Trotec Group. This is followed by the next step, the expansion in Spain. "Trotec has been growing continuously since the company was founded. In 2015 we reported record earnings of more than 100 million euros. Our export share is 97%. The expansion in Spain is one cornerstone of our growth strategy," says Trotec's President Andreas Penz. Trotec is an international company with 17 subsidiaries. The innovation leader Trotec is setting new standards, serving customers in over 90 countries and employs more than 500 people worldwide.
