First class consumables solutions to make our customers more profitable

The Trotec Materials Customer Service Team are here to help. Our friendly and experienced team will help you with any enquiry you have, from sheet materials to Laserable consumables, they are the experts. Please feel free to call them on **0844 800 0020** (then press Option 1) or email them on **Sales@troteclaser.co.uk** and they will be happy to help with advice, quotations and support!

We carry over £1M worth of stock in our main UK warehouse, offering an unrivalled solution for our clients. Due to our standard 24 hour despatch service, let us take the strain of holding stock for you. From Rowmark to IPI sheet material, our own popular Private Label sheet material, Laserable products including Pens, Key rings, Wine boxes and more, to Metals including Steel, Anodised Aluminium and Brass through to all types of Timber and Granite solutions. We are here to help!

Your machines might already be working at full capacity and you might not have the manpower or the right equipment to give your plaques, signs or badges a real professional finish. Save time. Let our highly trained staff cut material sheets to your specification, ready for you to engrave or print. All our materials including metals can be cut to size. Badges, discs, ovals and even shapes can be delivered faster than ever.

We offer a free of charge sample service on most of our products, despatched within 24 hours from our Newcastle HQ.

Printed colours in this catalogue should only be used as a guide not for colour matching purposes. Please ask our sales office for sample chips if you require an accurate match-up. Sheet sizes and thickness may vary slightly – if dimensional information is important please ask our sales office for confirmation. We reserve the right to change or vary our products without prior notice. We also reserve the right to charge for shipping back orders – subject to information given at the time of ordering. All orders are subject to carriage and VAT at the ruling rate. Terms and conditions of business available on request.

→ Machines and materials

Laser Machines

Trotec has developed the broadest, most economical range of flatbed lasers to satisfy marking, cutting or engraving applications. These highly refined, beautifully engineered engraving systems are fast and supremely accurate and as a result they produce finely detailed and high quality engraving and cutting. Trotec is well established as a leading manufacturer of laser systems and part of the successful Trodat group of companies. Established in 1997 to focus exclusively on the needs of laser engraving, cutting and marking, Trotec have experience of more than 10,000 installed laser systems in around 90 countries and 200 employees.

Rotary Machines

As much as lasers have revolutionised the engraving industry with their ability to produce highly detailed graphics and photographic images, there is still a high demand for mechanical engraving. They are the only solution for deep engraving into metals or engraving materials that are not laser friendly. At Trotec we offer the range of Vision systems which are designed to help you produce these jobs quickly and efficiently.

Technical Support

As a machine owner, reliability must be high on your priority list. Well... it's at the top of our list! We understand however, that machines can break down and always at the most inconvenient moment. Our tech support team has the remit to deal with any incident as quickly as they possibly can and with a reputation built on fast efficient service, you can expect to be back up and running in no time at all. We continue to build on our expertise and we are growing our team in line with increasing sales which should ensure that we are always ready to serve. In addition, our Protection Plan enables you to extend your laser's warranty to up to 10 years.

Customer Support

Trotec are passionate about customer care – we understand that when you are considering any purchase from a £40,000 machine to a £20 sheet of material, it's important to know that you are dealing with a company who understands the business and cares about yours! Our engineers are well trained and our sales office is very experienced, making us the ideal supplier to help grow your business.

→ Features & Benefits

InPack technology

InPack Technology is a combination of high quality components and protective measures designed to extend the life of the laser.

Control of the filter system

Trotec filter systems are automatically controlled via JobControl®. You can start the filter either before or after engraving to optimise the removal of dust and fumes.

JobControl®

Our JobControl® software makes handling your engraving and cutting jobs effortless. Packed full of intelligent time-saving functions, it is provided with all of our lasers as standard.

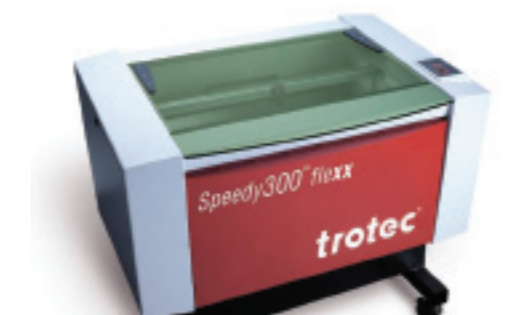

Ready for Flexx

Our unique Flexx technology allows you to combine two laser sources in a single machine for the first time ever. You can upgrade your single-source laser to a Flexx system at any time.

Focusing lenses

Every Speedy comes complete with a lens designed to provide perfect results for most standard engraving and cutting jobs. Additional lenses are available to suit specialist applications.

Flexible table design

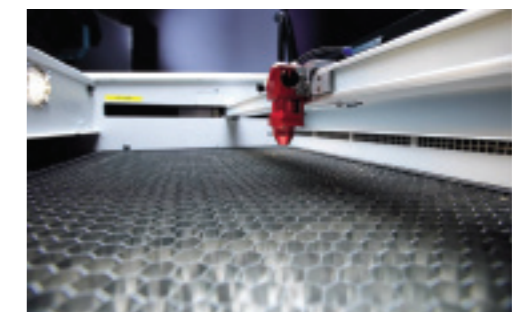

Our unique table design makes switching between jobs quicker than ever before. This comes as standard on our Speedy 400 model and means you simply attach the right table for your application - no tools needed.

Laser Pointer and Auto-focus

A red laser pointer indicates the precise location where the laser beam will contact the material. Our auto-focus features ensures the laser beam is correctly focused when contacting materials and comes as standard on selected models in the Speedy range.

Ferromagnetic working platform

All Speedy models are equipped with a ferromagnetic working platform, making it ideal for mounting thin materials such as paper or films using magnets to ensure an even, flat surface.

For a copy of our Trotec Laser Machine brochure, please contact the customer services team on 0844 800 0020 or email them on sales@troteclaser.co.uk.

Global organisation for local customer satisfaction

You can find Trotec offices in:

Austria (headquarters), Germany, Switzerland, France, the Netherlands, United Kingdom, Poland, Russia, China, Japan, USA, Canada, South Africa and Australia.

Distribution and service centres

In 90 countries around the world.
