

# Trotec Educator Advocate Program

Join a nationwide community of educators using laser technology to transform hands-on learning.

The Trotec Educator Advocate Program highlights outstanding classroom projects, supports collaboration between peers, and promotes real-world skill development—powered by the unmatched speed and simplicity of Ruby® software.

As an Advocate, you'll show how Ruby® removes barriers to creativity and makes laser workflows effortless for both teachers and students. By sharing project ideas, classroom success stories, and practical tips, you'll help more schools experience why Trotec is the most trusted, educator-friendly laser solution in the industry.

### Who we're looking for

- Educators using Trotec + Ruby® in classrooms, labs, or makerspaces
- Passionate supporters of project-based, student-driven learning
- Teachers willing to share workflows, insights, and success stories

### Your role

- Submit 1-2 lesson plans or case studies per year
- Share classroom projects (#TrotecEDU)
- Serve as a reference or mentor for new adopters
- Join 1-2 virtual community sessions each year

### What makes an advocate

- Showcase how Ruby® simplifies design to laser workflows
- Demonstrate hands-on CAD/CAM and fabrication skills
- Highlight laser projects that build real-world career readiness

### Who we're looking for

- Welcome Kit with laserable badge, shirt & signage
- Material credits for referrals
- Spotlight opportunities on the Trotec EDU site
- Early access to Ruby® features & new hardware
- Certificate for PD portfolios and grant applications

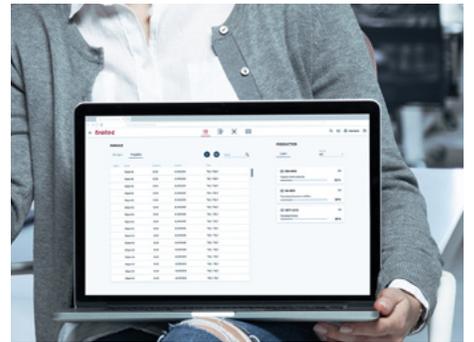

# Why it matters – A partnership that drives progress

## For Educators

- Professional growth & recognition through national exposure
- Classroom resources & project visibility to boost engagement
- Networking with top educators using real-world tools
- PD credit and resume value tied to innovation and leadership

## For Trotec

- Authentic, educator-driven marketing that inspires others
- Reference-ready sites that showcase Ruby in action
- Case studies & classroom proof for real-world credibility
- Increased brand trust through peer-led success stories

Together, we're not just using laser technology.  
We're shaping the future of learning, one student at a time.
