

How to enable laser warmup in JobControl

First open the machine lid and manually locate the laser head in a central location (X & Y).

Next power on the laser and open the laser software JobControl

Then connect in JobControl

Once connected, navigate to Options within JobControl - This can be done in 2 ways as per below images.

TROTEC JobControl® 11.3	3.0 - [Plate1]					
😥 File Edit Engraver	Plate Settings View	Window Help		<u>S</u> et	tings <u>V</u> iew <u>W</u> indow <u>H</u> elp
